

Return to driving checklist

- Decide if you really need to return to driving.
- Discuss returning to driving with your treating doctor.
- Take a visual perimetry test (Esterman Visual Field Assessment) available from an optometrist or ophthalmologist.
- Discuss vision test results with your treating doctor.
- Are other assessments required? These might include:
 - a neuropsychological assessment
 - an OT driving assessment.
- Make sure you submit a VicRoads form completed by your doctor.
